CERTIFICATE

This is to certify that the project titled Evaluating the Implementation of Pradhan Mantri Garib Kalyan Anna Yojana in Prayagraj, Uttar Pradesh, India being submitted by AVINASH SINGH (2024MB12), PRASHANT SHARMA (2024MB26), RAJ PRIYA(2024MB28), RAVI SRIVASTAVA (2024MB29) and HIMANSHU RAJ (2024MB71) to School of Management Studies, Motilal Nehru National Institute of Technology Allahabad, in the partial fulfillment of the requirements for the degree of Master of Business Administration (M.B.A), is a record of original work carried out by them under our supervision and guidance.

Date:

Dr. Vibhuti Tripathi

Dr. Premalatha P.

Dr. Neeraj Gautam

ACKNOWLEDGEMENT

The development of this project needed the support of many people and hence we would like to express our sense of profound gratitude and indebtedness to all the people who have been instrumental in making our project a rich experience. Our sincere thanks to our project guide **Associate Professor Dr. Vibhuti Tripathi**, School of Management Studies, MNNIT Allahabad for allocating this project to us, was giving her valuable time, guiding us continuously and satisfying our queries. We are grateful to **Assistant Professor Dr. Premlatha P. & Dr. Neeraj Gautam** for their expert guidance and cooperation throughout the duration of the project. Our heartfelt thanks to the Head of Department, Professor Dr. Tanuj Nandan, the administrative staff and all the respondents who have spared their valuable time in completing the questionnaire and helped in carrying out this project. We also thank them for their ideas, critical insights and suggestions, which have enriched the report.

CHAPTER - 1

INTRODUCTION

1.1 Introduction

Food Security is a fundamental aspect of human well-being and development, referring to the condition in which all individuals, always, have access to sufficient, safe, and nutritious food to maintain an active and healthy life. It encompasses not only the availability of food but also its affordability, accessibility, and utilization. Achieving food security requires a stable and sustainable food system that addresses the diverse dietary needs of people across different regions and communities.

However, food security is influenced by a complex array of factors, including economic stability, agricultural productivity, environmental sustainability, and social and political conditions. In recent years, challenges such as climate change, population growth, economic inequality, and political instability have put increased pressure on food systems globally, making the achievement of food security a critical issue for policymakers, development organizations, and communities worldwide.

Addressing food security requires coordinated efforts to improve food distribution, enhance agricultural practices, strengthen social safety nets, and build resilience against external shocks. In this context, food security is not just a goal for survival, but a cornerstone of global development, contributing to poverty reduction, health improvement, and overall economic growth.

1.2 Food Security in India

Food security in India remains a critical issue, despite the country's rapid economic growth over the past two decades. While global food insecurity has decreased, India continues to face significant challenges in ensuring that all its citizens have access to adequate, nutritious food. With over 190 million undernourished people in 2016 the highest in any single country India experiences widespread hunger, malnutrition, and an increasing issue of obesity. Contributing factors include the migration from rural to urban areas, a declining contribution of agriculture to the GDP, and the adverse effects of climate change, which disrupt food production and distribution.

India's Global Hunger Index (GHI) ranking underscores its persistent challenges, with high rates of stunting and wasting among children. Hidden hunger, a form of chronic micronutrient deficiency, further complicates the food security landscape, affecting long-term health, especially in children.

To address these issues, India has implemented a range of food security measures, the most prominent being the Public Distribution System (PDS), one of the largest universal distribution systems globally. Through partnerships between central and state governments, the PDS provides subsidized food grains, including rice and wheat, to millions of households. It has been restructured over the years to better target lower-income groups, with the introduction of schemes like the Targeted Public Distribution System (TPDS) and Antyodaya Anna Yojana to reach the most vulnerable populations.

The National Food Security Act (NFSA) of 2013 further bolstered India's efforts by giving legal backing to food security and expanding coverage to 75% of the rural population and half of the urban population. It emphasized a life-cycle approach to food security, providing support for pregnant women, lactating mothers, and children through programs like the Mid-Day Meal Scheme.

Despite these initiatives, India's food security system faces challenges, including corruption, mismanagement, and under-coverage. While the PDS and NFSA have improved access to calories, concerns about targeting inefficiencies, diversion of food supplies, and lack of accountability remain significant barriers to achieving full food security in the country. Understanding and addressing these challenges is crucial to strengthening India's fight against hunger and malnutrition.

1.3 Statement of Problem

The Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY), launched in 2020, aimed to provide free food grains to vulnerable populations, especially during the COVID-19 pandemic. While the scheme helped alleviate food insecurity for millions, it faced several challenges. These included inadequate coverage of beneficiaries, especially migrant workers and the homeless, and logistical issues in the distribution process, particularly in rural and remote areas. Concerns about the quality of food grains distributed also emerged, and the financial sustainability of the program was questioned due to the strain it placed on government resources. Additionally, the scheme faced challenges with monitoring and accountability, leading to instances of diversion and corruption. Despite these issues, PMGKAY played a crucial role in providing immediate relief during the pandemic, but addressing these challenges is essential for improving its effectiveness in the future.

1.4 Need of the Study

The study of the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) is essential to evaluate its effectiveness in addressing food insecurity, especially during the COVID-19 pandemic, and to identify areas for improvement in future welfare programs. The scheme aimed to provide free food grains to vulnerable populations, but its implementation faced several challenges. A detailed study can assess

whether the program successfully reached its intended beneficiaries, including marginalized groups such as migrant workers and the homeless, who were sometimes excluded from the formal Public Distribution System (PDS). It can also examine the logistical and distribution challenges faced by the government, particularly in rural, remote, and conflict-prone areas, and suggest improvements in infrastructure and administrative processes. Additionally, the study would help evaluate the financial sustainability of the scheme, especially considering the large-scale distribution of food grains, and determine whether such a model could be maintained in the long term without straining public finances. Furthermore, the study can assess the effectiveness of monitoring and accountability mechanisms, highlighting issues such as diversion, corruption, and leakage that occurred in some instances. Overall, the insights gained from this study will be valuable in informing future food security policies, ensuring more efficient implementation of welfare programs, and making them more inclusive and equitable, particularly in times of crisis.

1.5 Objective of Pradhan Mantri Garib Kalyan Anna Yojna

The primary objectives of the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) are as follows:

- 1. Ensure Food Security:** Provide free food grains to eligible beneficiaries, particularly the poor and vulnerable sections of society, to address food insecurity during crises like the COVID-19 pandemic.
- 2. Support During Economic Disruptions:** Extend aid to those affected by economic disruptions, such as job losses and income shortages caused by the pandemic and lockdowns.
- 3. Prevent Hunger Crisis:** Ensure that individuals and families do not suffer from hunger or malnutrition, even during emergencies.
- 4. Strengthen the Public Distribution System (PDS):** Utilize the existing PDS infrastructure to distribute food grains efficiently and reach a large number of beneficiaries.
- 5. Support Migrant Workers:** Offer benefits to migrant workers and their families through mechanisms like the One Nation One Ration Card (ONORC) to facilitate portability and access to rations across the country.
- 6. Provide Nutritional Support:** Include essential food items such as wheat, rice, and pulses to cater to the basic nutritional needs of the population.

1.6 Benefits

The COVID-19 pandemic threw unprecedented challenges in livelihoods, particularly for the daily wage worker and poor households, in March 2020. In this backdrop, the Indian government had to take an initiative of PMGKAY to check the economic impact and avoid food insecurity. Under the scheme, about

80 crore beneficiaries were provided free of cost with an additional 5 kg of food grains per person per month in addition to their regular entitlements under NFSA. It effectively doubled the monthly disbursement of food grains such that no vulnerable household faces a threat of shortages amidst the crisis.

PMGKAY was undertaken in seven phases, considering the length of time the pandemic affects, from April 2020 to December 2022. During this time, it disbursed some 1,015 lakh metric tonnes (LMT) of food grains within the country:

Phase I (April–June 2020): 112.6 LMT

Phase II (July–November 2020): 186.2 LMT

Phase III: May–June 2021 = 75.2 LMT

Phase IV: July–November 2021 = 186.7 LMT

Phase V: Dec 2021–March 2022 = 149 LMT

Phase VI: April–Sept 2022 = 217 LMT

Phase VII: Oct–Dec 2022 = 88.27 LMT

1.7 Public Distribution System (PDS)

The Public Distribution System (PDS) in India is one of the largest food security programs in the world, established to provide subsidized food grains to millions of low-income households. Originally launched during World War II and evolving over time, the PDS aims to improve food security by distributing essential commodities like rice, wheat, sugar, and kerosene through a network of fair price or ration shops. It is a collaborative effort between the central and state governments, with the Food Corporation of India (FCI) procuring food grains from farmers at guaranteed prices, which are then distributed to state governments at subsidized rates. In 1997, the Targeted Public Distribution System (TPDS) was introduced to focus on economically weaker sections, aiming to better target food aid to low-income families. Programs like the Antyodaya Anna Yojana, launched in 2000, further streamlined PDS to support the poorest households with highly subsidized food.

The National Food Security Act (NFSA) of 2013 marked a significant milestone by providing statutory backing to food security programs, ensuring legal rights to subsidized food grains for around 75% of the rural population and 50% of the urban population. The NFSA also covers vulnerable groups, including pregnant and lactating women, and children through the Integrated Child Development Services and Mid-Day Meal Scheme.

Despite its broad reach, the PDS faces several challenges, including issues of corruption, mismanagement, under-coverage, and diversion of food supplies. While it has improved calorie intake for millions, concerns about inefficiencies in targeting and distribution hinder its effectiveness in fully addressing India's food security needs.

1.8 National Food Security Act

National Food Security Act (NFSA), 2013 is a significant legislation introduced in India to address food security by ensuring access to adequate food for a healthy life. It is based on the principles of availability, accessibility, utilization, and stability of food.

The National Food Security Act (NFSA), 2013 was enacted to ensure food security for all Indian citizens, recognizing food as a fundamental right derived from the right to life with dignity under Article 21 of the Indian Constitution. The Act aims to provide subsidized food grains to 75% of the rural population and 50% of the urban population, benefiting approximately 81.34 crore people through the Public Distribution System (PDS). By transitioning from a welfare-based to a rights-based approach, the NFSA gives citizens a legal entitlement to food, empowering them to demand their due. The Act adopts a life-cycle approach, addressing the nutritional needs of vulnerable groups such as pregnant and lactating women, who are entitled to free meals and ₹6,000 in maternity benefits, and children (6 months to 14 years), who receive free meals through the Integrated Child Development Services (ICDS) and Mid-Day Meal (MDM) programs. It also provides additional nutritional support for malnourished children under 6 years. The NFSA sets higher nutritional standards to cater to the diverse needs of different age groups, ensuring that food assistance is both sufficient and nutritious. In cases where food grains are not supplied, the Act mandates compensation in the form of a food security allowance. The implementation of the NFSA involves both the Central Government, which allocates and transports food grains, and the State/UT Governments, which handle the distribution to beneficiaries. Through these provisions, the NFSA seeks to combat hunger, malnutrition, and food insecurity, particularly for vulnerable populations.

Objectives: The Act strives to reduce food insecurity and malnutrition by ensuring a steady supply of subsidized food grains. It addresses various vulnerabilities, including poverty, migration, and exclusion from welfare schemes, ensuring that no eligible person is left out.

1.9 Rural Food Security

Rural food security refers to ensuring that people in rural areas, where a large portion of the population often relies on agriculture and informal labour, have consistent and sufficient access to nutritious food. Rural populations are particularly vulnerable to food insecurity due to economic instability, limited access to infrastructure, unpredictable weather patterns, and reliance on seasonal agricultural income. Achieving

rural food security is essential for overall national food security, as a significant percentage of food production occurs in rural areas.

Key Aspects of Rural Food Security

- i. **Availability of Food:** Ensuring that food is available in rural areas through local production, storage, and distribution systems. In many rural regions, food availability can fluctuate due to seasonal harvests and poor infrastructure, making it harder to access food year-round.
- ii. **Access to Food:** Economic and physical access to food is crucial. Rural populations often face financial barriers, with limited cash flow outside of harvest seasons. Distance from markets, poor transportation networks, and inadequate public distribution systems can also restrict physical access to food.

1.10 Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY)

The **Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY)** is a major welfare scheme introduced by the Government of India in March 2020 to address food security challenges during the COVID-19 pandemic. Launched as part of the broader **Pradhan Mantri Garib Kalyan Package (PMGKP)**, it aimed to support vulnerable populations facing economic hardships and unemployment. The scheme provided free food grains to beneficiaries covered under the **National Food Security Act (NFSA)**, ensuring no individual went hungry during the crisis.

Key Features

Under PMGKAY, beneficiaries received **5 kg of free rice or wheat per person per month**, over and above their regular entitlements under NFSA. Approximately **80 crore people**, or two-thirds of India's population, were covered under the scheme, including households under the **Antyodaya Anna Yojana (AAY)** and **Priority Households (PHH)**. The scheme was fully funded by the Central Government, covering all costs associated with procurement, storage, and distribution. Food grains were distributed through the **Public Distribution System (PDS)**, with Aadhaar-based authentication and e-POS systems ensuring transparency.

Implementation and Financial Outlay The scheme was initially introduced for **three months (April-June 2020)** but was later extended multiple times due to prolonged economic disruptions. Its various phases ran until **December 2022**, after which the benefits were merged with NFSA to institutionalize free food grain distribution. The financial commitment for the scheme was immense, costing the government over ₹2.6 lakh crore by 2022 and distributing more than **1,000 lakh metric tons** of food grains.

Impact of PMGKAY

PMGKAY had a transformative impact on India's fight against hunger, particularly during the pandemic. It ensured food security for millions of migrant workers, daily wage earners, and economically weaker sections, reducing their financial burden and addressing hunger. Additionally, the scheme reinforced the government's commitment to social equity by prioritizing marginalized communities. By making food grains readily available, it supported households in maintaining their nutritional needs during a period of widespread uncertainty.

Challenges and Limitations

Despite its success, the scheme faced challenges, such as logistical hurdles in distributing food grains to remote areas and instances of delays in delivery at the state level. Some beneficiaries were excluded due to outdated data or technical issues with Aadhaar authentication. Reports of leakages and diversion of food grains also highlighted areas for improvement in the system.

Conclusion

The **Pradhan Mantri Garib Kalyan Anna Yojana** was a lifeline for millions during one of India's most challenging times. Its strategic extensions and eventual integration with NFSA reflect the government's commitment to ensuring food security for the poor. While operational challenges existed, PMGKAY's success in addressing hunger and reducing inequality remains a landmark in India's social welfare initiatives. PMGKAY has been extended multiple times to ensure continuous support to millions of households, especially during times of economic stress and income instability.

1.11 Government and Policy Interventions

- 1 **Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY):** Implemented during the COVID-19 pandemic, PMGKAY provided an additional 5 kg of free food grains per person to existing NFSA beneficiaries, helping rural communities maintain food security during economic hardships
- 2 **National Food Security Act (NFSA):** Provides subsidized food grains to rural households, making food affordable for economically vulnerable populations. NFSA's benefits reach many rural families, contributing to food stability.
- 3 **Public Distribution System (PDS):** Distributes essential food items like rice, wheat, and sugar at subsidized rates to rural households. In remote areas, efforts are being made to improve the efficiency of PDS to reduce leakages and ensure that benefits reach intended beneficiaries.

- 4 **Integrated Child Development Services (ICDS):** Offers nutritious meals to children and pregnant or lactating mothers in rural areas through Anganwadi centres, reducing malnutrition and supporting maternal and child health.

1.12 Research Objectives

- 1 To assess rural residents awareness and accessibility regarding entitlements, pricing, and allocation under PMGKAY.
- 2 To assess accountability and transparency in PMGKAY food grain distribution for rural residents.
- 3 To evaluate the effectiveness of grievance resolution for rural residents under food security scheme.
- 4 To provide food security to vulnerable populations, particularly those living below the poverty line.
- 5 Alleviating financial challenges of rural households through PMGKAY by ensuring access to essential food grains.

1.13 Organization Chart

The Report Is Likely Structured As:

1. **Introduction** - Overview Of PMGKAY and Objectives And Significance Of The Scheme
2. **Statement Of Problem** - Challenges in implementation.
3. **Literature Review** - Summary Of Past Studies And Findings.
4. **Methodology** - Research design and data collection approach.
5. **Findings And Analysis** - Results Of The Study.
6. **Conclusions And Recommendations** - Policy Suggestions For Improvement.

CHAPTER - 2

LITERATURE REVIEW

A literature review on the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) can provide insights into its purpose, effectiveness, challenges, and its impact on food security in India, particularly in the wake of the COVID - 19 pandemic. The following review explores the origins, key objectives, implementation, and criticisms surrounding PMGKAY, drawing from studies and reports by various scholars, institutions, and policy analysts.

2.1 Background and Objectives of PMGKAY

The Pradhan Mantri Garib Kalyan Anna Yojana was launched in March 2020 as part of the larger Pradhan Mantri Garib Kalyan Package (PMGKP), a financial relief package introduced by the Government of India to combat the economic and social hardships induced by the COVID-19 pandemic. Scholars such as Roy and Sinha (2021) emphasize that PMGKAY was designed to address the immediate food security needs of economically vulnerable populations, who faced a sudden loss of income due to the lockdown measures (Roy & Sinha, 2021). Under PMGKAY, additional food grains were distributed free of charge to National Food Security Act (NFSA) beneficiaries, enhancing the regular entitlements provided under the Public Distribution System (PDS).

2.2 Research Study

Swati Narayan (2021), in the Indian Journal of Human Development, examines India's food distribution policies during the COVID-19 pandemic, emphasizing the limitations of targeted food relief programs despite record food grain surpluses. The study highlights the exclusion of nearly 42% of the population without ration cards under the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY), exacerbating food insecurity and economic distress among marginalized communities during strict lockdowns. It advocates for a universal expansion of the Public Distribution System (PDS) to address systemic inequalities, ensure equitable access to food, and safeguard the nutritional needs of vulnerable populations, especially during crises like the pandemic.

Dr. Satabdi Das (2020), in her article "India and Sustainable Development Goals: The Challenges and Prospects Amidst Pandemic," published in *Prati Dhvani – The Echo*, explores the role of the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) in mitigating the impacts of the COVID-19 pandemic while addressing broader sustainable development and food security goals in India. The study analyses the scheme's objectives, implementation, effectiveness, and challenges, referencing various reports, including those by Prasad & Singh (2021), Niti Ayog (2017), and others. Findings reveal that while PMGKAY was pivotal in providing relief and mitigating hunger among vulnerable populations, its

implementation faced significant challenges, limiting its effectiveness in achieving comprehensive food security. The article concludes that PMGKAY has been a critical intervention in addressing food insecurity, ensuring access to free rations, and alleviating the adverse effects of the pandemic on livelihoods and nutritional security.

Dr. Navaneeta Bhuyan (2020), in the paper "Covid Crisis and Attempts at Labour Management in India," published in the International Journal of Management (IJM), examines the impact of the COVID-19 pandemic on migrant labourers and evaluates governmental measures for their resettlement and support, including the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY). While PMGKAY was envisioned as a comprehensive food security initiative during the crisis, its implementation faced significant challenges, such as distribution inefficiencies and limited accessibility, which hindered its ability to fully achieve its goals. The findings highlight that although PMGKAY had the potential to alleviate food insecurity among poor and migrant populations, these issues prevented it from providing the intended relief to many vulnerable beneficiaries, underscoring the need for improved execution to maximize its impact.

Pramod E. K. and Dr. Y. C. Ibrahim, in their study "The Right to Food during the Pandemic: A Study of Pradhan Mantri Garib Kalyan Anna Yojana," analyse the role of the state in ensuring the right to food during crises like the COVID-19 pandemic, drawing on debates around state versus market governance in economic policy. The paper references international frameworks, such as the Universal Declaration of Human Rights and the National Food Security Act (NFSA), emphasizing the guaranteed right to food. Highlighting insights from scholars like Amartya Sen on the importance of rationing during emergencies, the study traces the historical shift from laissez-faire economics to state-led interventions, underscoring the necessity of government programs like PMGKAY to combat hunger. The PMGKAY, which provided free food grains to over 80 crore beneficiaries under the NFSA, played a critical role in preventing widespread starvation despite disruptions in food supply chains, economic hardships, and rising food prices. The scheme demonstrated the resilience of India's Public Distribution System (PDS) in addressing food insecurity during an unprecedented crisis.

Dr. Navaneeta Bhuyan, in her article "COVID Crisis and Attempts at Labour Management in India," published in the International Journal of Management (IJM), examines the challenges faced by migrant labourers during the COVID-19 pandemic and evaluates the adequacy of measures taken for their resettlement in home states. The study highlights the prevalence of unskilled labour in India, driven by economic disparities and the rise of urban employment opportunities, particularly in sectors like e-commerce. The pandemic-induced shutdown of industries led to the sudden displacement of millions, triggering mass migration and severe food insecurity. While government initiatives such as Shramik Express trains, food schemes, the One Nation, One Ration Card system, and employment programs aimed to address these challenges, their effectiveness was marred by mismanagement and inefficiencies. Many

migrants returned home only to find limited opportunities for work and continued struggles with hunger, which often outweighed concerns about disease or life itself. The study underscores the persistent vulnerability of migrant labourers, for whom hunger remains the most significant factor in decision-making and survival.

Hanumant Shahaji Sawant, in the study "An Empirical Analysis of Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) With Special Reference to Sangli District," explores the role of food security in improving the living standards of the poor during the COVID-19 pandemic, with a focus on the Sangli district. The research highlights PM-GKAY as the world's largest food security program, which provided free food grains to over 66% of ration card holders in the region. This initiative significantly reduced food insecurity, prevented starvation, and improved the social and economic status of poor households during the lockdown. By alleviating financial burdens on low-income families, PM-GKAY contributed to enhanced social welfare and economic stability, underscoring the critical role of food security in national health and resilience during crises.

Jose Ma. Luis Montesclaros (2022), in the study "India's Approach to Food Security Resilience Amid COVID-19: Relevance to ASEAN?" highlights India's successful food security strategies during the COVID-19 pandemic, which effectively minimized extreme poverty through targeted food subsidy policies. The study emphasizes India's use of digital systems, such as the Digital Ration Card (DRC) and Aadhaar, to ensure efficient and equitable food distribution. It suggests that India's approach offers valuable insights for ASEAN Member States (AMS) in addressing food security challenges. By integrating market mechanisms with supportive government interventions, AMS can strengthen their resilience to future disruptions. The study also calls for further research and collaboration between India and AMS to exchange best practices and develop strategies for enhancing food security across the region.

Alan Gelb, Anurodh Giri, Anit Mukherjee, Ritesh Rautela, Mitul Thapliyal, and Brian Webster (2022), in their study "Beyond India's Lockdown: PMGKAY Benefits During the COVID-19 Crisis and the State of Digital Payments," evaluate the effectiveness of India's Pradhan Mantri Garib Kalyan Yojana (PMGKAY) during the COVID-19 pandemic. The study highlights the substantial relief provided to vulnerable populations through the program, despite significant logistical and informational barriers, especially during the initial lockdown. It emphasizes the role of digital payments in enhancing social protection measures but notes persistent gender disparities and uneven access to technology and awareness, which hindered equitable access to benefits. The findings underscore the importance of addressing these disparities and improving infrastructure to ensure more inclusive social protection in future crises.

Dr. Pankaj Kumar, in his study "An Analysis of Some Poverty Alleviation and Employment Generation Programmes in India," examines the effectiveness of various government schemes aimed at improving livelihoods and generating employment, particularly in rural areas. Drawing on reports from sources such

as the Oxford Poverty and Human Development Initiative, Credit Suisse Research Institute, and the International Food Policy Research Institute, the study assesses the progress and challenges of these initiatives. Findings reveal that government schemes, like MGNREGS, have significantly contributed to employment generation, skill enhancement for rural workers, and the construction of essential infrastructure such as Anganwadi buildings. The research concludes that the Indian government's multi-faceted approach to implementing these programs has been effective in reducing rural poverty and improving employability, underscoring the importance of such initiatives in promoting sustainable development.

Pushpa Singh (2021), in her study "Management of the Pandemic: Agriculture, Food Management, and Resilience During COVID-19 in India," explores the critical role of the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) in mitigating food insecurity during the pandemic. By providing additional food grains to over 80 crore vulnerable individuals through the Public Distribution System (PDS), PMGKAY alleviated immediate food shortages caused by economic disruptions. The study highlights the program's effectiveness in offering essential relief to millions during the crisis. However, it also emphasizes the need for long-term strategies to ensure food security, advocating for a shift towards localized, diverse, and resilient food systems. Improved implementation and expanded outreach of such initiatives are recommended to address systemic vulnerabilities and better serve marginalized communities in the future.

The study by Jabir Ali and Waseem Khan (2022), published in the International Journal of Science Education, examines the access of rural households in India to relief through social assistance programs during the COVID-19 pandemic, focusing on initiatives like the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY). The research highlights the distribution of food grains as relief in-kind (RIK) and cash transfers through programs like PM-KISAN and PM-JDY. It assesses the factors influencing access to these benefits and evaluates their effectiveness across various demographics and states. The review emphasizes the critical role of these social assistance programs in mitigating the pandemic's adverse effects on rural households, while also identifying gaps in policy implementation and access. A significant number of rural households, particularly female-headed, low-income, and below-poverty-line families, benefitted from the free food grains under PMGKAY. Access to cash transfers was also widespread, with male-headed households and younger individuals receiving the benefits. However, the study found variations in access across states, with higher participation rates in regions like Andhra Pradesh and Bihar. While the PMGKAY and related relief measures had a positive impact on food security, the findings underline the need for more targeted strategies to ensure equitable distribution and improve the effectiveness of these programs across diverse demographic groups.

Ashutosh Trivedi's 2021 article in the Indian Studies Review Journal explores the role of the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) in addressing food security for migrant workers during the COVID-19 pandemic. The study highlights the multifaceted challenges faced by migrant workers,

including job losses and food insecurity, exacerbated by the pandemic. PMGKAY aimed to provide free food grains to vulnerable populations, particularly migrant workers, during the nationwide lockdown. The scheme played a crucial role in alleviating food shortages and offering vital support to millions of workers who were facing economic hardship. However, the study also identifies significant challenges in the implementation of the scheme, such as issues with ration card portability and limited awareness among beneficiaries, which hindered access to the relief. Despite these challenges, PMGKAY proved effective in reducing hunger and providing essential relief to affected populations. The article underscores the need for a comprehensive rethink of migration policies in India, urging better planning and governance to ensure that the rights and needs of migrant workers are adequately addressed in future crises.

2.3 Conclusion and Future Implications

Overall, the literature on PMGKAY presents a mixed yet largely positive assessment of the scheme's impact on food security and poverty alleviation. The initiative's rapid deployment and large-scale reach were crucial in mitigating the food security crisis exacerbated by the pandemic, especially for rural and economically marginalized communities. However, the challenges related to logistical execution, fiscal burden, and inclusivity call for further enhancements to India's food distribution policies.

PMGKAY has been instrumental in highlighting the importance of adaptive social protection mechanisms in times of crisis. Future research could focus on strengthening the public distribution system, enhancing ration card portability, and ensuring that food assistance is adaptable to a range of potential future challenges, including economic, environmental, and health-related crises.

CHAPTER - 3

REASERCH METHODOLOGY

3.1 Introduction

The study was conducted in a village adopted by MNNIT Allahabad under **Pradhan Mantri Garib Kalyan Anna Yojana under Department of Food and Public Distribution Ministry of Consumer Affairs**, Government of India program to uplift rural India. The program is being launched in collaboration with National Institute of Technology (NITs) and other leading Government Engineering Institutes like College of Engineering, Pune across the country. The village selected for the study are: **Gajyani Saraiya** and **Pasiyapur** ,Prayagraj under Pradhan Mantri Garib Kalyan Anna Yojana under Department of Food and Public Distribution Ministry of Consumer Affairs Government to uplift rural India. The program is being launched in collaboration with the Indian Institutes of Technology (IITs), National Institutes of Technology (NITs) and other leading Government Engineering Institutes like College of Engineering, Pune across the country.

3.2 Research Questions

1. What is the level of awareness among rural residents regarding their entitlements under the PMGKAY, and how accessible are food grain entitlements, pricing, and allocation to them?
2. How can accountability, transparency, and quality standards be assessed in the PMGKAY food grain distribution for rural residents?
3. How effective are the existing grievance redressal mechanisms and complaint resolution processes for rural residents regarding food security schemes?
4. How can food security be effectively provided to the most vulnerable and disadvantaged populations, particularly those living below the poverty line?
5. How does PMGKAY alleviate the financial challenges of rural households by ensuring access to essential food grains?

3.3 Population and Sample

3.3.1 Target Population

The target population for the study are rural people living in the village "Prayagraj" which are adopted by MNNIT Allahabad under "**Pradhan Mantri Garib Kalyan Anna Yojana**". The rural people are included in the study as target population the whole study is based upon the skill development in rural areas.

3.3.2 Sample Frame

The range of taking sample with respect to the age, income level, religion, gender, occupation, skills etc have been fixed after doing extensive study about skill development through secondary data. Sample has been framed in a way that the sample represents the population and there is no difference between sample and population i.e. the characteristic of sample is same as population.

3.3.3 Sampling Technique

The technique for taking sample from population is random sampling, as one sample is randomly taken from one house of the village. Question was asked from one member of a family which was taken randomly and it was difficult to cover each and every member of the family. The member of the family which was taken as the sample represent the family. 3.3.4 Sample Size There were a total of ____persons for collecting samples from the village and each person had collected ____samples. So, the total sample size of the study is 58.

3.4 Questionnaire Design

Awareness and Accessibility-The first objective is to assess how well rural residents are informed about the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY), including their knowledge of entitlements such as food grains, eligibility criteria, and the overall objectives of the scheme. This will help identify gaps in awareness and communication regarding the program's benefits.

Accountability & Transparency- This objective aims to evaluate the transparency of the food grain distribution process under the scheme, focusing on how information about food grain entitlements, pricing, and allocation is communicated to beneficiaries. It also examines the accountability of local officials and ration dealers in ensuring fair and equitable distribution, while addressing concerns such as illegal practices, discrepancies in entitlements, and quality control issues.

Grievances-The third objective is to assess the effectiveness of grievance redressal mechanisms for rural beneficiaries who face challenges in accessing food grains under PMGKAY. This will involve analyzing how efficiently and promptly complaints are resolved and how accessible the grievance systems are to the rural population.

Impact on Food Security- This objective focuses on evaluating the success of PMGKAY in providing food security to vulnerable and economically disadvantaged populations, particularly those living below the poverty line (BPL). It seeks to determine whether the scheme adequately addresses food shortages and provides timely assistance to households during crises.

Poverty Alleviation and Financial Challenges-The final objective is to assess how PMKGAY contributes to poverty alleviation and the financial well-being of rural households. Specifically, it aims to measure

the impact of free food grain distribution on reducing economic hardship, improving household food security, and easing the financial burden on families during times of crisis.

3.5 Data Collection

The data is collection for the first time and directly from the respondent through questionnaire, so the source of data collection is primary. Data is collected via survey through questionnaire from two above mentioned villages. The data was collected on Quantitative and Qualitative basis.

Qualitative basis means the analysis which was observation based.

Quantitative basis was done with the help of questionnaire basis

3.6 Summary of Methods and Tools of Analysis Used

The method used here is survey through questionnaire. Each respondent was to give answer of 45 questions during the survey. After collecting the data, the analysis is done through SPSS.

CHAPTER - 4

ANALYSIS AND FINDINGS

4.1 Introduction

This chapter consists of quantitative and qualitative analysis of the data collected from the respondents of the two villages. There are certain interpretation and findings from the data collected. The interpretation is done on the basis of data and also on personal observation and interaction with the respondents.

4.2 Quantitative Findings

What is your age group?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Less than 18	3	5.2	5.2	5.2
	18-30	18	31.0	31.0	36.2
	31-45	17	29.3	29.3	65.5
	46-60	14	24.1	24.1	89.7
	More than 60	6	10.3	10.3	100.0
	Total	58	100.0	100.0	

Table 1-Demographic analysis of Age

The age group distribution appears to be centred around 18-60 years, with the majority in 31-60 years. This indicates that the population surveyed is likely dominated by adults, with some spread into slightly older groups. The mean, median, and mode being close suggests a relatively symmetric distribution of responses.

Gender

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	M	50	86.2	86.2	86.2
	F	8	13.8	13.8	100.0
	Total	58	100.0	100.0	

Table 2-Demographic analysis of Gender

The sample is predominantly male (86.2%), with females making up a small proportion (13.8%).

What is your monthly household income (in INR)?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	Less than 5000	12	20.7	20.7	20.7
	5000-10000	30	51.7	51.7	72.4
	10000-20000	15	25.9	25.9	98.3
	20000-40000	1	1.7	1.7	100.0
	Total	58	100.0	100.0	

Table 3-Demographic analysis of Income

- The majority (51.7%) of participants have a monthly household income between 5000 and 10000 INR.
- Nearly all participants (98.3%) have incomes below 20000 INR, highlighting a low-income demographic.
- Only 1 participant (1.7%) reported a household income of 20000–40000 INR, suggesting very few in the sample are in the higher-income bracket.

What is your highest level of education?

		Frequency	Percent	Valid Percent	Cumulative Percent
Valid	10th	35	60.3	60.3	60.3
	12th	11	19.0	19.0	79.3
	Graduation	12	20.7	20.7	100.0
	Total	58	100.0	100.0	

Table 4-Demographic analysis of Education

- The majority (60.3%) of participants have completed only up to the 10th grade, indicating a predominantly low level of education in the sample.
- A smaller portion (20.7%) has a graduation-level education, while only 19.0% have completed up to the 12th grade.
- This suggests the survey group largely represents individuals with lower educational qualifications.

Are you aware of the PMGKAY and its benefits

N	Valid	58
	Missing	0
Mean		1.0000
Median		1.0000
Mode		1.00

Table 5- Are you aware of the PMGKAY and its benefits

- This table indicates that all the population are aware about the PMGKAY. This shows complete uniformity in responses, meaning every participant provided the same answer.

1. AWARENESS AND ACCESSIBILITY

Count

		I receive food grains through the Pradhan Mantri Garib Kalyan Anna Yojana					Total
		Strongly disagree	Disagree	Neutral	Agree	Strongly agree	
What is your age group?	Less than 18	0	0	0	1	2	3
	18-30	1	0	2	6	9	18
	31-45	1	0	0	4	12	17
	46-60	0	1	0	2	11	14
	More than 60	0	0	1	0	5	6
Total		2	1	3	13	39	58

Table 6-Frequency age vs awareness

Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)
Pearson Chi-Square	13.185 ^a	16	.659
Likelihood Ratio	15.777	16	.469
Linear-by-Linear Association	1.073	1	.300
N of Valid Cases	58		

H₀: There is no significant relationship between awareness of the Pradhan Mantri Garib Kalyan Anna Yojana and age group.

H₁: There is no significant relationship between awareness of the Pradhan Mantri Garib Kalyan Anna Yojana and age group.

CONCLUSION

In the context of awareness and accessibility our null hypothesis is not rejected which means that there is no relationship between the age group and the awareness and accessibility.

2. ACCOUNTABILITY AND TRANSPRENCY

What is your age group? * I have not experienced corruption or irregularities in the distribution of food grains. Crosstabulation

Count

		I have not experienced corruption or irregularities in the distribution of food grains.					Total
		Strongly Disagree	Disagree	Neutral	Agree	Strongly agree	
What is your age group?	Less than 18	0	1	0	1	1	3
	18-30	3	3	2	6	4	18
	31-45	1	4	0	6	6	17
	46-60	1	2	0	3	8	14
	More than 60	0	2	0	1	3	6
Total		5	12	2	17	22	58

Table 7- Frequency vs Transparency

Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)
Pearson Chi-Square	11.695 ^a	16	.765
Likelihood Ratio	12.442	16	.713
Linear-by-Linear Association	1.627	1	.202
N of Valid Cases	58		

Table 8- Chi square test age vs Transparency

H₀: There is no significant relationship between accountability and transparency the Pradhan Mantri Garib Kalyan Anna Yojana and age group.

H₁: There is significant relationship between accountability and transparency the Pradhan Mantri Garib Kalyan Anna Yojana and age group.

CONCLUSION

In the context of accountability and transparency our null hypothesis is not rejected which means that there is no relationship between the age group and the accountability and transparency.

3. GRIEVANCES

What is your monthly household income (in INR)? * I have not been asked to pay extra charges or bribes to receive food grains under PMGKAY. Crosstabulation

Count

		I have not been asked to pay extra charges or bribes to receive food grains under PMGKAY.					Total
		Strongly disagree	disagree	neutral	agree	Strongly agree	
What is your monthly household income (in INR)?	Less than 5000	0	1	0	3	8	12
	5000-10000	2	5	1	6	16	30
	10000-20000	0	0	0	10	5	15
	20000-40000	0	0	0	1	0	1
Total		2	6	1	20	29	58

Table 9- Frequency income vs grievances

Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)
Pearson Chi-Square	15.616 ^a	12	.209
Likelihood Ratio	17.754	12	.123
Linear-by-Linear Association	.092	1	.762
N of Valid Cases	58		

a. 15 cells (75.0%) have expected count less than 5. The minimum expected count is .02.

Table 10- Chi square income vs grievances

H₀: There is no significant relationship between grievances the Pradhan Mantri Garib Kalyan Anna Yojana and income.

H₁: There is significant relationship between grievances the Pradhan Mantri Garib Kalyan Anna Yojana and income.

CONCLUSION

In the context of grievances our null hypothesis is not rejected which means that there is no relationship between the income and the grievances.

4. IMPACT ON FOOD SECURITY

Count

		I receive food grains through the Public Distribution System					Total
		Strongly disagree	disagree	neutral	agree	Strongly agree	
What is your monthly household income (in INR)?	Less than 5000	1	1	1	4	5	12
	5000-10000	2	2	5	11	10	30
	10000-20000	0	0	0	11	4	15
	20000-40000	0	0	0	1	0	1
Total		3	3	6	27	19	58

Table 11- Frequency income vs Food security

Chi-Square Tests			
	Value	df	Asymptotic Significance (2-sided)
Pearson Chi-Square	10.035 ^a	12	.613
Likelihood Ratio	12.986	12	.370
Linear-by-Linear Association	.780	1	.377
N of Valid Cases	58		

Table 12- Chi square income vs Food security

H₀: There is no significant relationship between impact on food security the Pradhan Mantri Garib Kalyan Anna Yojana and income.

H₁: There is significant relationship between impact on food security the Pradhan Mantri Garib Kalyan Anna Yojana and income.

CONCLUSION

In the context of impact on food security our null hypothesis is not rejected which means that there is no relationship between the income and the impact on food security.

5. POVERTY ALLEVIATION AND FINANCIAL CHALLENGES

Count

		Poverty alleviation programs have significantly benefited your family.					Total
		Strongly disagree	Disagree	Neutral	Agree	Strongly agree	
What is your monthly household income (in INR)?	Less than 5000	0	2	2	3	5	12
	5000-10000	2	2	5	11	10	30
	10000-20000	1	0	3	7	4	15
	20000-40000	0	0	0	1	0	1
Total		3	4	10	22	19	58

Table 13- Frequency income vs Financial Challenges

Chi-Square Tests

	Value	df	Asymptotic Significance (2-sided)
Pearson Chi-Square	6.530 ^a	12	.887
Likelihood Ratio	8.033	12	.783
Linear-by-Linear Association	.003	1	.960
N of Valid Cases	58		

Table 14- Chi square income vs financial challenges

H₀: There is no significant relationship between poverty alleviation and financial challenges the Pradhan Mantri Garib Kalyan Anna Yojana and income.

H₁: There is significant relationship between poverty alleviation and financial challenges the Pradhan Mantri Garib Kalyan Anna Yojana and income.

CONCLUSION

In the context of poverty alleviation and financial challenges our null hypothesis is not rejected which means that there is no relationship between the income and the poverty alleviation and financial challenges.

CHAPTER - 5

DISCUSSIONS

The Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) was introduced as a welfare measure to address food security challenges during the COVID-19 pandemic. Its implementation aimed to provide free food grains to vulnerable populations, ensuring sustenance for millions of economically weaker households.

Key Discussion Points:

1. Awareness Levels:

A significant proportion of beneficiaries are aware of their entitlements under PMGKAY, primarily due to targeted outreach programs and community awareness campaigns. However, gaps remain, particularly in remote rural areas, where literacy levels and access to information channels are limited. Addressing these gaps is critical to ensuring equitable distribution of benefits.

2. Accessibility and Allocation:

While most beneficiaries reported receiving their entitled food grains, challenges such as irregular supply, long distribution queues, and discrepancies in allocated versus received quantities persist. Additionally, marginalized groups and those without proper documentation face barriers in accessing their entitlements.

3. Grievance Redressal Mechanisms:

The effectiveness of grievance redressal systems remains a crucial area for improvement. While mechanisms such as toll-free helplines and local-level complaint resolution exist, awareness about these services is limited, and response times can be slow. Strengthening these systems is essential for addressing beneficiaries' concerns effectively.

4. Impact on Food Security:

PMGKAY played a vital role in mitigating hunger and malnutrition during a critical period. Its success underscores the importance of targeted, scalable welfare initiatives during times of crisis.

5. Policy Implications and Recommendations:

- Sustaining awareness programs to ensure long-term benefits.
- Simplifying processes for accessing entitlements, especially for marginalized groups.

- Regular monitoring and evaluation to identify and resolve implementation challenges.
- Enhancing the grievance redressal framework for faster resolution and increased trust in the system.

CHAPTER - 6

CONCLUSION

The Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) has been a transformative initiative aimed at ensuring food security for millions of vulnerable households during an unprecedented global crisis. By providing free food grains to economically weaker sections of society, the scheme addressed immediate hunger and nutritional needs, alleviating the financial burdens of countless families during the COVID-19 pandemic. Its impact has been significant, particularly in rural and underserved areas, where food security was a pressing concern.

Despite its success, the implementation of PMGKAY has highlighted areas that require further attention to maximize its potential. While awareness levels among beneficiaries have improved due to government outreach efforts, significant gaps remain in remote and marginalized communities. Ensuring that every entitled individual is informed about their benefits is essential to achieving equitable distribution. Similarly, challenges related to accessibility persist, including delays in food grain distribution, supply inconsistencies, and logistical hurdles that disproportionately affect the most vulnerable groups. These barriers underscore the need for streamlining processes and leveraging technology to enhance efficiency and transparency.

The role of grievance redressal mechanisms in addressing beneficiary complaints has also come to light as a critical aspect of the scheme. Although the existence of toll-free helplines and localized resolution systems is commendable, limited awareness of these mechanisms and delays in addressing complaints have hindered their effectiveness. Strengthening these systems and ensuring timely responses to grievances can foster greater trust and participation among beneficiaries.

PMGKAY has demonstrated the importance of scalable and targeted welfare programs in mitigating food insecurity during crises. Its success sets a precedent for future policy design, emphasizing the need for comprehensive planning, real-time monitoring, and community engagement to address the dynamic needs of diverse populations. However, transitioning from a crisis-response measure to a sustainable welfare framework will require continued investment in infrastructure, awareness campaigns, and policy innovation.

In conclusion, while PMGKAY has significantly contributed to alleviating hunger and poverty during a critical period, addressing the highlighted gaps is vital for ensuring its long-term impact. By focusing on inclusivity, accessibility, and accountability, the government can build on the scheme's achievements and work toward a more resilient and equitable food security system for all.

School of Management Studies
Motilal Nehru National Institute of Technology, Allahabad Prayagraj – (211004) India

PRADHAN MANTRI GARIB KALYAN ANNA YOJANA QUESTIONNAIRE

This questionnaire is a component of a study being conducted for the Master's program at School of Management Studies, MNNIT Allahabad. Your responses will be used only for academic purposes. We thank you sincerely in advance for your valued participation.

Section A: Demographic Information

Question	Options
What is your age group?	Less than 18 years ☐ 18 – 30 years ☐ 31– 45 years ☐ 46 – 60 years ☐ More than 60 years ☐
What is your highest level of education?	10th ☐ 12th ☐ Graduation ☐
What is your primary occupation?	Farmer ☐ Labourer ☐ Self-employed ☐ Home-maker ☐ Unemployed ☐
How many people live in your household?	1–3 ☐ 4–6 ☐ 7–9 ☐ 10 or more ☐
Gender	Male ☐ Female ☐
What is your marital status?	Married ☐ Unmarried ☐
Do you have any physical disability?	Yes ☐ No ☐
How long have you been living in this village?	Less than 10 years ☐ 10–20 years ☐ 20–30 years ☐ 30 years ☐
What is your monthly household income (in INR)?	Less than ₹5,000 ☐ ₹5,000–10,000 ☐ ₹10,000–20,000 ☐ ₹20,000–40,000 ☐
Do you have an internet connection at home?	Yes ☐ No ☐
What type of house do you live in?	Kuccha House ☐ Pucca House ☐
Do you have a ration card?	Yes ☐ No ☐
Do you have a bank account?	Yes ☐ No ☐

B. Awareness & Accessibility	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
I receive food grains through the Pradhan Mantri Garib Kalyan Anna Yojana	☐	☐	☐	☐	☐
The nearest PMGKAY centre is easily accessible without requiring long travel	☐	☐	☐	☐	☐
I do not face challenges in accessing food grains through the Pradhan Mantri Garib Kalyan Anna Yojana.	☐	☐	☐	☐	☐
I am satisfied with the quality and quantity of food grains provided through the PMGKAY	☐	☐	☐	☐	☐

I am aware of the amount of food grain your family is eligible to receive each month from the Public Distribution System	☐	☐	☐	☐	☐
I am informed about the prices I should pay for food grains provided through government schemes	☐	☐	☐	☐	☐
C. Accountability & Transparency					
I have not encountered issues with corruption or irregularities in food distribution	☐	☐	☐	☐	☐
I am satisfied with the transparency of the food distribution process.	☐	☐	☐	☐	☐
I believe the government or local authorities take action against irregularities or complaints reported by the community	☐	☐	☐	☐	☐
There are community meetings or local gatherings are held to discuss issues related to food Distribution.	☐	☐	☐	☐	☐
D. Grievances					
Local officials are responsive to grievances related to food distribution.	☐	☐	☐	☐	☐
I have not faced any issues or grievances in receiving food grains under PMGKAY.	☐	☐	☐	☐	☐
I have not been asked to pay extra charges or bribes to receive food grains under PMGKAY.	☐	☐	☐	☐	☐
I have not faced issues related to the eligibility verification process for PMGKAY.	☐	☐	☐	☐	☐
E. Impact on Food Security					
PMGKAY provisions have improved food security for your family.	☐	☐	☐	☐	☐
The health of children and women in your family has improved due to PMGKAY provisions.	☐	☐	☐	☐	☐

My family has access to adequate food throughout the year without shortages.	☐	☐	☐	☐	☐
I receive food grains through the Public Distribution System	☐	☐	☐	☐	☐
F. Poverty Alleviation and Financial Challenges					
Loan programs or financial assistance services have helped your family meet its needs.	☐	☐	☐	☐	☐
Poverty alleviation programs have significantly benefited your family.	☐	☐	☐	☐	☐
Job losses, seasonal work, or other economic factors have not impacted your food security.	☐	☐	☐	☐	☐

Thank you for your Participation
